Marketability & Liquidity

The subject is considered illiquid relative to publicly traded securities. Based on comparable listings and absorption in the Savannah industrial submarket, a marketing period of six to nine months would be required to achieve the concluded value in an arm's-length sale. This appraisal supersedes the prior report on file dated March 2025; material market movement and one new lease since that date support the revised conclusion.

Scope & Methodology

Value concluded via reconciliation of the Sales Comparison and Income Capitalization Approaches. The Cost Approach was considered but given diminished weight due to the age of improvements. This is a summary report intended to comply with USPAP Standards Rule 2-2(b) and is not a self-contained appraisal report.
